

▶▶ MASTS

1m, 2m and 3m masts made of hot galvanized steel or stainless steel.

5'8m, 7'6m and 8'6m telescopic masts in connectable sections and 8m and 9m telescopic masts with internal joint. Made of hot galvanized Steel.

▶ applications

- Fixation and support of Air terminals and ESE lightning rods.
- Vertical fastening by anchors.
- Horizontal fastening on flat roof by base plate supports.

▶ features and benefits

- Wind exposure resistance.
- Easy assembly of the Air terminals by the head-mast adaptor piece.
- Many different anchor solutions to all kind of structures.
- High Corrosion durability.

▶ installation

- Connect the Air terminal with the top part of the mast using the head-mast adaptor piece, and fasten it by a hexagonal M8 screw.
- Secure connection of Telescopic masts using 2 M10 screws. For the internal joint models, M12 screws shall be used.
